

Delivering SAS Clinical Data Integration

CUSTOMER FOCUSED SOLUTIONS

d-Wise builds solutions focused on solving your company's technology and business process challenges.

SYSTEM INTEGRATION

d-Wise successfully helps build bridges between your disparate systems automating the flow of information.

DATA STANDARDS

d-Wise designs, develops, and implements data standards significantly improving your company's efficiency and automating processes

TECHNOLOGY ADOPTION

d-Wise understands technology is only a small piece of improving your business model. The most critical part is the people and your ability to manage the changes technology brings to your organization.

SAS Clinical Data Integration provides the best of SAS data warehousing capabilities combined with clinically relevant functionality to give you a powerful solution for clinical data transformations. The solution provides the ability to:

- ◆ Build a single, integrated platform to access and manage data from a wide range of sources
- ◆ Identify and automate repeatable processes based on a common platform to reduce manual intervention and speed processes
- ◆ Ensure the proper use of standards by analyzing both the structure and the content of the data and using CDISC standards such as ODM and SDTM

d-Wise Experience

As Life Science technology consultants and a preferred partner of SAS, **d-Wise** brings a unique level of expertise not found anywhere else.

d-Wise brings the following to your project:

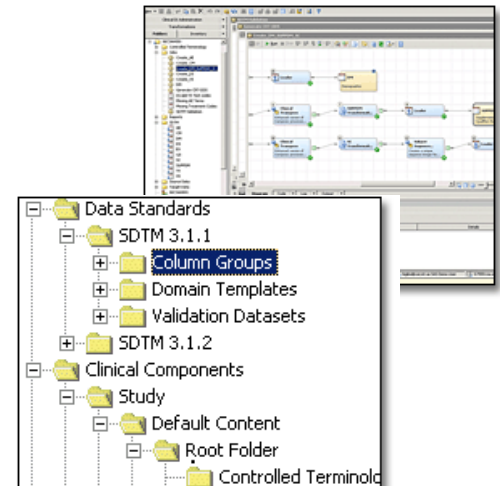

Over 20 years working with SAS data warehousing solutions

Extensive knowledge of CDISC and clinical data standards

Experience implementing the SAS Clinical Data Integration solution

Extensions to the SAS Clinical Data Integration solution to meet your specific business needs

As a trusted partner of SAS, **d-Wise** is the only choice to help your company navigate the challenges of adopting this solution and the associated change it brings to your company and processes.

d-Wise Services

Within the **d-Wise** Life Sciences Practice, the **Standards Implementation Team** will help your company implement and optimize your Clinical Data Integration environment. This can include:

- ◆ Help define a strategic roadmap for your implementation
- ◆ Installation, configuration, and customization of the solution
- ◆ Customization of the metadata and transformations to support your process
- ◆ Workshop to share best practices for your user group
