Expertise, with industry focus.

Incorporated in 2003, d-Wise is a consulting and technology leader that solves the data, technology, analytical and process challenges facing life sciences and healthcare companies. Our first-hand understanding of the unique challenges faced by the evolving life science and healthcare industries enables us to provide solutions custom-tailored to each client's needs.

d-Wise brings a technology-agnostic approach to providing product development, analytical consulting, data preparation, advisory service and modernization solutions that bridge organizational silos and leverage existing and new technology investments.

Led by a team of experts in clinical trials, healthcare analytics, data standards and emerging technologies, d-Wise brings together the people, processes, data and technology to deliver on its bold vision.

“ *The work we do is guided by our laser focus on value. d-Wise ensures that your data, systems and solutions serve your business needs and get you the results you need.* ”

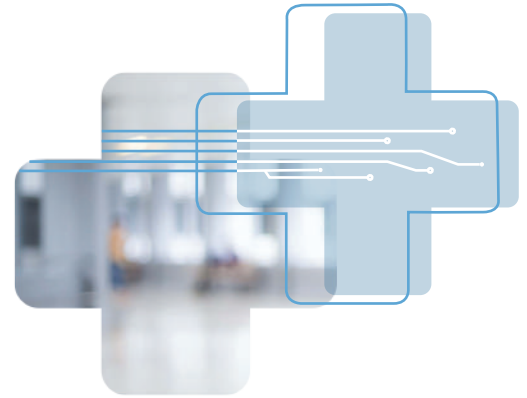

John Leveille
d-Wise CEO

Healthcare Practice

We're fortunate to live in a world where profound insight can come from healthcare data. d-Wise has extensive experience in delivering solutions to Healthcare organizations to improve processes and optimize the vast amount of data across business systems.

- » Optimize internal processes
- » Analyze trends in the data to make informed decisions
 - » Manage the risk associated with health insurance
 - » Identify individuals before they become high-cost

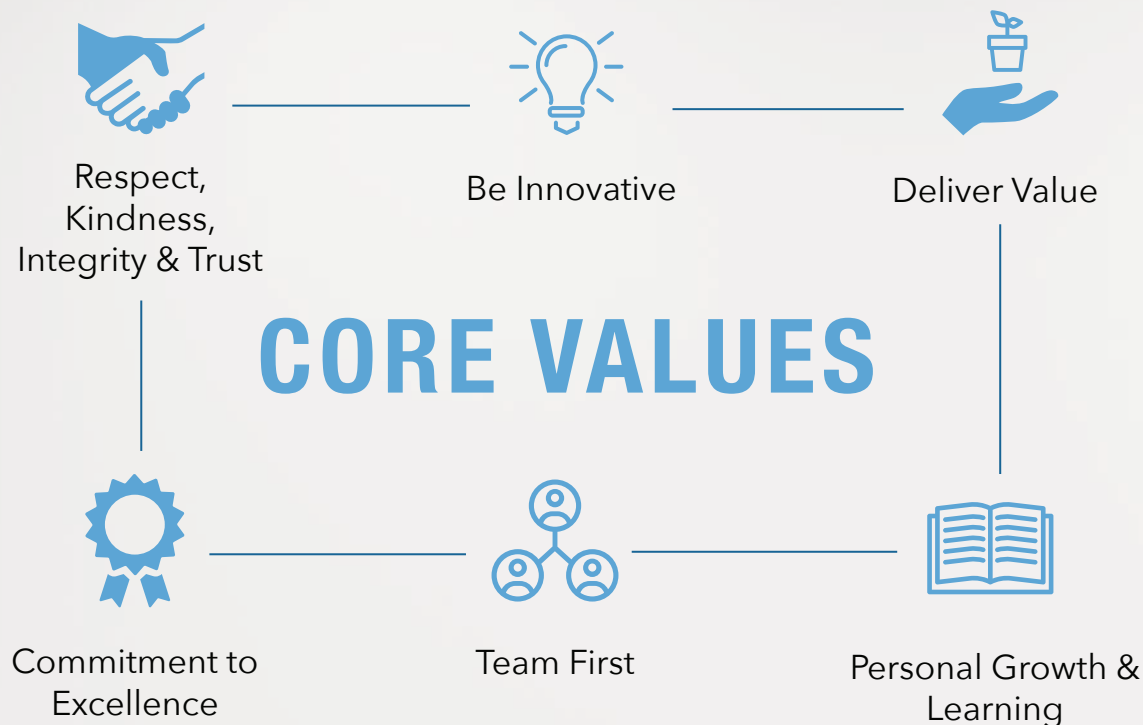

Life Science Practice

d-Wise combines extensive experience in clinical data collection, transformation, and analysis with knowledge of CDISC and other industry standards to help life sciences companies optimize technology so more time is spent on the real science of drug development.

- » Develop and implement clinical data standards
 - » Seamlessly integrate clinical systems
- » Customize technology strategy to business needs and goals
